

## FinnSonic Spintec

Washes the parts for you!

Top loading single stage spray washing machines

- for maintenance washing at workshops
- for washing between different production phases
- for saving time in parts cleaning
- for safe and comfortable working conditions

## Working is nicer with clean parts!

Parts cleaning before maintenance or between production phases is often necessary, not only for technical reasons, but also for the operators to feel good at work. FinnSonic Spintec wash machine is the solution for fast parts cleaning. Cleaning in a closed chamber upgrades conditions in the working environment.

## FinnSonic Spintec cleaning machine

Parts for washing are loaded into the wash basket from the top of the machine. During the washing the liquid is sprayed from under and top of the parts, and also from the sides. The basket is rotating inside the machine, which provides even washing result. Storage tank for the detergent is located on the bottom of the machine, and it is equipped with heating. Water based chemical, heat and pressure spraying create a good washing result together.

- **Easy to control** with digital handling timer and temperature controlling. Level controller protects the machine from running dry.
- **Long lasting materials:** chamber, spray pipes, nozzles, pump, and valves are of stainless steel.
- **Ergonomic lid** is equipped with gas springs, safety switch, and vapor removal connection.
- Included as a standard are also **compressed air gun** for drying the parts and **adjustable feet** for easy installation.

## Options

- **Removable basket** for versatile handling options of the components in production. \*
- **Loading carriage** for moving even the heaviest parts easily and safely from a place to another. \*
- **Heat insulation** saves energy in colder working conditions.
- **7-day timer** heats the washing liquid automatically according to the work schedule of the user. .
- **Filtration circulation** is cleaning the detergent from particles, and prolongs the lifetime of the detergent.
- **Oil separator** removes oil from the detergent and reduces the amount of waste water.
- **Automatic filling and detergent dispenser** assure even washing result for longer washing series. .

\*Available for models 82 - 125.

## Technical data

Model	Basket diameter	Max. load	Max. height of the load - non-removable basket mm	Max. height of the load - removable basket mm	External dimensions				Tank volume	Pump outcome	Pump pressure	Heating
					Width	Length	Height (lid closed)	Height (lid open)				
	mm	kg	mm	mm	mm	mm	mm	mm	l	l/min	bar	kW
